

## Wrongful Death

**We represent families who have lost loved ones through the careless or reckless actions of individuals, corporations, or other entities.**

We recognize that each family member may be affected in unique ways and have unique losses. We work with grief therapists and other counselors to understand these losses and to secure a just result for the family. For example, we have worked with families in wrongful death cases involving tractor-trailer and tanker collisions, defective products, poor security at apartment buildings, and in pro bono representation stemming from the 9/11 attack on the World Trade Center.
